

CLAIMS

We claim:

1. A dispenser for bathtub faucet comprising:

5 a basket having a substantially trapezoidal shape, said basket having a top end, a bottom wall, a front wall, a back wall, a left wall and a right wall, said basket top end being open, said basket bottom wall having a plurality of bottom wall perforations therein, said basket capable of retaining solid soap pieces therein; and

10 a bracket connected to said basket back wall, said bracket connectable to a bathtub faucet.

2. The dispenser for bathtub faucet of claim 1 wherein:

said basket back wall having a faucet bore therethru, said faucet bore capable of allowing the passage of a bathtub faucet therethru.

3. The dispenser for bathtub faucet of claim 1 wherein:

15 said basket front wall having a plurality of front wall perforations therethru.

4. The dispenser for bathtub faucet of claim 1 wherein:

said basket left wall having a plurality of left wall perforations therethru.

5. The dispenser for bathtub faucet of claim 1 wherein:

20 said basket right wall having a plurality of right wall perforations therethru.

6. The dispenser for bathtub faucet of claim 1 further comprising:
a securing screw threadably connected to said bracket for frictionally
engaging said bathtub faucet.

- 5 7. The dispenser for bathtub faucet of claim 1 wherein:
said basket width is 7 ½ inches.

8. The dispenser for bathtub faucet of claim 1 wherein:
said basket length is 8 ½ inches.

9. The dispenser for bathtub faucet of claim 1 wherein:
10 said basket depth is 5 inches.

10. The dispenser for bathtub faucet of claim 1 wherein:
said basket is comprised of plastic.

11. A dispenser for bathtub faucet comprising:
15 a basket having a substantially trapezoidal shape, said basket having a top
end, a bottom wall, a front wall, a back wall, a left wall and a right wall, said
basket top end being open, said basket bottom wall having a plurality of bottom
wall perforations therein, said basket capable of retaining solid soap pieces
therein, said basket back wall having a faucet bore therethru, said faucet bore
20 capable of allowing the passage of a bathtub faucet therethru; and
a bracket connected to said basket back wall, said bracket connectable to a
bathtub faucet.

12. The dispenser for bathtub faucet of claim 11 wherein:

said basket front wall having a plurality of front wall perforations
therethru.

13. The dispenser for bathtub faucet of claim 12 wherein:

5 said basket left wall having a plurality of left wall perforations therethru.

14. The dispenser for bathtub faucet of claim 13 wherein:

said basket right wall having a plurality of right wall perforations
therethru.

10 15. The dispenser for bathtub faucet of claim 14 further comprising:

a securing screw threadably connected to said bracket for frictionally
engaging said bathtub faucet.

16. The dispenser for bathtub faucet of claim 15 wherein:

15 said basket width is 7 ½ inches.

17. The dispenser for bathtub faucet of claim 16 wherein:

said basket length is 8 ½ inches.

18. The dispenser for bathtub faucet of claim 17 wherein:

said basket depth is 5 inches.

20 19. The dispenser for bathtub faucet of claim 18 wherein:

said basket is comprised of plastic.

20. A dispenser for bathtub faucet comprising:

a basket having a substantially trapezoidal shape, said basket having a top end, a bottom wall, a front wall, a back wall, a left wall and a right wall, said basket top end being open, said basket bottom wall having a plurality of bottom wall perforations therein, said basket capable of retaining solid soap pieces therein, said basket back wall having a faucet bore therethru, said faucet bore capable of allowing the passage of a bathtub faucet therethru, said basket front wall having a plurality of front wall perforations therethru, said basket left wall having a plurality of left wall perforations therethru, said basket right wall having a plurality of right wall perforations therethru, said basket width is 7 ½ inches, said basket length is 8 ½ inches, said basket depth is 5 inches, said basket is comprised of plastic;

a bracket connected to said basket back wall, said bracket connectable to a bathtub faucet; and

a securing screw threadably connected to said bracket for frictionally engaging said bathtub faucet.
